

PUBLIC WORKS DEPARTMENT

Design Criteria and Standard Specifications

The Design Criteria and Standard Specifications contained in this booklet shall govern the design and construction of public infrastructure within the City Limits of Manhattan Kansas. These documents are a compilation of efforts by previous staff that developed the 1989 version and efforts by the current staff the past year utilizing input solicited from state agencies outside sources to provide direction and guidance.

The City of Manhattan is subject to all State of Kansas and Federal Laws and Regulations.

These documents are intended to cover the majority of the types of construction encounter within the City of Manhattan and are meant to augment existing laws and regulations passed by those bodies of government. It is the responsibility of the contractor, architect and engineer to use judgment to determine if a project requires further analysis by a licensed design professional.

Promulgated by City Engineer on January 23, 2009
