

# SNOWPLOW SAFETY

Plows travel slowly

## 15 MPH OR LESS

Operators have a blind spot directly behind their trucks

## GIVE THEM ROOM

Keep a safe distance behind — at least 15 car lengths

## AVOID SPRAY

Plows also spread sand or deicer on roads, which can damage your vehicle if you're too close

## DON'T PASS

NEVER pass a plow on the right side

Don't pass in a snow cloud

The City of Manhattan and its operators appreciate your cooperation
